## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 8-13 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by US 6,164,494 to Marelli.

Marelli shows a liquid dosing dispenser with a device for counting dispensing doses, as seen in Figs. 1, having a fixed ratchet member 11, a trigger member 5 arranged to undergo reciprocal movement for actuation of the device, a counter 16 in the form of a ring arranged to undergo a counting movement and having a first region 18 for interaction with the trigger member and a second region 19 with multiple incline sections and teeth as seen in Figs. 5 and 6, a second counting ring 21 and an aerosol container 3 with a ferrule 4 for connecting the container to the counting device.

In reference to claims 10 and 11, the trigger has to be fully depressed for the counting ring to undergo rotation and to result in the device counting the actuation, see Figs. 5 and 6.
